It is very important to know the most about an issue of this magnitude. Unfortunately, DOE has not been truthful with us about the dangers and hazards of storing the waste in Yucca Mountain. For a study to be honest, it must be open to the public and not hide the dangers it will pose to them. How many places in America are like Yucca Mountain and how many other places can store the radioactive waste. I am opposed to it being brought here in Nevada because it is not known whether it is the best location to store waste.
